NOTE: The indexes of aggregate weekly hours are calculated by dividing the current month's estimates of aggregate hours by

the corresponding 2002 annual average levels. Aggregate hours estimates are the product of estimates of average weekly hours and production and nonsupervisory employment. Data are currently projected from March 2011 benchmark levels. When more recent benchmark data are introduced with the release of January 2013 estimates, all seasonally adjusted data from January 2008 forward are subject to revision.
