CONSUMER PRICE INDEX: MAY 2008

The Consumer Price Index for All Urban Consumers (CPI-U) increased 0.8 percent in May, before seasonal adjustment, the Bureau of Labor Statistics of the U.S. Department of Labor reported today. The May level of 216.632 (1982-84=100) was 4.2 percent higher than in May 2007.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) increased 1.0 percent in May, prior to seasonal adjustment. The May level of 212.788 (1982-84=100) was 4.5 percent higher than in May 2007.

The Chained Consumer Price Index for All Urban Consumers (C-CPI-U) increased 0.6 percent in May on a not seasonally adjusted basis. The May level of 124.645 (December 1999=100) was 3.6 percent higher than in May 2007. Please note that the indexes for the post-2006 period are subject to revision.

CPI for All Urban Consumers (CPI-U)

On a seasonally adjusted basis, the CPI-U advanced 0.6 percent in May, following a 0.2 percent increase in April. The index for energy, which was virtually unchanged in April, increased 4.4 percent in May. The index for petroleum-based energy advanced 5.8 percent and the index for energy services rose 2.3 percent. The food index rose 0.3 percent in May. The index for food at home, which advanced 1.5 percent in April, also increased 0.3 percent, as five of the six major grocery store food groups registered substantial deceleration. The index for all items less food and energy advanced 0.2 percent in May, following a 0.1 percent rise in April. Upturns in the indexes for lodging away from home, for public transportation, and for household furnishings and operations more than offset a downturn in the index for apparel.

Recreation2	.0	.2	.1	.3	-.1	.1	1.0	1.2
Education and communication0	.3	.4	.1	.3	.4	.4	4.2	3.0
Other goods and services2	.3	.4	.2	.4	.5	.4	5.3	3.6
Special indexes:									
Energy	6.9	1.7	.7	-.5	1.9	.0	4.4	28.2	17.4
Food4	.1	.7	.4	.2	.9	.3	6.2	5.1
All items less food and energy2	.2	.3	.0	.2	.1	.2	1.8	2.3

During the first five months of 2008, the CPI-U rose at a 4.0 percent seasonally adjusted annual rate (SAAR). This compares with an increase of 4.1 percent for all of 2007. The index for energy advanced at a 16.5 percent SAAR in the first five months of 2008 after advancing 17.4 percent in all of 2007. Petroleum-based energy costs increased at a 13.9 percent annual rate and charges for energy services rose at a 20.3 percent annual rate. The food index has increased at a 6.3 percent SAAR thus far this year, following a 4.9 percent rise for all of 2007. Excluding food and energy, the CPI-U advanced at a 2.0 percent SAAR in the first five months, following a 2.4 percent rise for all of 2007.

The food and beverages index rose 0.3 percent in May. The index for food at home increased 0.3 percent, following a 1.5 percent rise in April. The index for cereal and bakery products recorded its fourth consecutive large advance--up 1.6 percent in May. Each of the other six major grocery store food groups decelerated in May. The index for fruits and vegetables, which increased 2.0 percent in April, was virtually unchanged in May. A 0.7 percent decline in the indexes for fresh fruits offset increases in the indexes for fresh vegetables and processed fruits and vegetables--up 0.5 and 0.4 percent, respectively. The index for meats, poultry, fish, and eggs, which advanced 0.9 percent in April, rose 0.1 percent in May. Beef prices, which declined 1.1 percent in April, rose 1.5 percent in May. Prices for poultry and for fish and seafood increased 0.8 and 0.9 percent, respectively. These increases were largely offset by decreases in the indexes for pork, for other meats, and for eggs. The index for dairy products declined 0.1 percent, following a 1.2 percent increase in April. Milk prices fell 0.7 percent, but were 10.2 percent higher than in May 2007. The index for nonalcoholic beverages, which increased 1.7 percent in April, declined 0.9 percent in May reflecting a 2.2 percent drop in the index for carbonated drinks. The index for other food at home rose 0.5 percent after advancing 1.9 percent in April. The other two components of the food and beverages index--food away from home and alcoholic beverages--increased 0.4 and 0.1 percent, respectively.

The index for housing rose 0.5 percent in May. The index for shelter increased 0.2 percent, following a 0.1 percent rise in April. Within shelter, the indexes for rent and owners' equivalent rent increased 0.2 and 0.1 percent, respectively. The index for lodging away from home, which had declined in each of the preceding three months, increased 1.3 percent in May. (Prior to seasonal adjustment, charges for lodging away from home declined 0.5 percent in May.) The index for household energy registered its fourth consecutive large increase--up 2.8 percent in May. The index for fuel oil rose 10.4 percent and was 64.0 percent higher than in May 2007. The indexes for natural gas and for electricity rose 5.6 and 0.9 percent, respectively. During the last 12 months charges for natural gas and for electricity increased 16.5 and 5.8 percent, respectively. The index for household furnishings and operations, which declined 0.1 percent in April, increased 0.2 percent in May.

The transportation index advanced 2.0 percent in May, reflecting large increases in the indexes for motor fuel and public transportation. The index for gasoline rose 5.7 percent and was 20.8 percent higher than in May 2007. (Prior to seasonal adjustment, gasoline prices in May rose 9.5 percent above their previous peak level recorded in April.) The index for new vehicles declined 0.1 percent and was 1.2 percent lower than in May 2007. The index for used cars and trucks declined 0.3 percent in May, but was 1.4 percent higher than a year ago. The index for public transportation advanced 2.3 percent in May, reflecting a 3.2 percent increase in the index for airline fares. (Prior to seasonal adjustment, airline fares rose 4.2 percent and were 14.4 percent higher than a year ago.)

The index for apparel fell 0.3 percent in May following a 0.5 percent increase in April. (Prior to seasonal adjustment, apparel prices declined 1.1 percent. Prices for women's and girls apparel decreased 2.2 percent. During the last 12 months, prices for women's and girls' clothing fell 5.0 percent, while prices for men's and boys' apparel increased 1.9 percent.)

Medical care costs rose 0.2 percent in May and were 4.1 percent higher than a year ago. The index for medical care commodities--prescription drugs, nonprescription drugs, and medical supplies--declined for the second consecutive month--down 0.7 percent in May. The index for medical care services increased 0.5 percent. Within the latter group, the indexes for professional services and for hospital and related services increased 0.7 and 0.4 percent, respectively.

The index for recreation, which declined 0.1 percent in April, rose 0.1 percent in May. Upturns in the indexes for admissions to movies, theaters, concerts, and sporting events and for photography, coupled with larger increases in the indexes for sporting goods and for pets, pet products and services more than offset declines in the indexes for video and audio and for toys.

The index for education and communication increased 0.4 percent in May. Educational costs rose 0.4 percent and the index for communication costs rose 0.3 percent. Within the latter category, increases in charges for telephone services more than offset a decline in the index for information technology, hardware and services. Local land-line telephone charges rose 0.3 percent and long distance land-line telephone charges rose 1.3 percent; wireless telephone services were unchanged. The index for information technology, hardware and services declined 0.5 percent, reflecting decreases in the indexes for personal computers and peripheral equipment and for computer software and accessories.

The index for other goods and services increased 0.4 percent in May. The index for tobacco and smoking products rose 0.8 percent and accounted for more than half of the increase in this major group.

CPI for Urban Wage Earners and Clerical Workers (CPI-W)

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers increased 0.7 percent in May.

Consumer Price Index data for June are scheduled for release on Wednesday, July 16, 2008, at 8:30 A.M. (EDT).

Facilities for Sensory Impaired

Information from this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200, Federal Relay Services: 1-800-877-8339.

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time of goods and services purchased by households. The Bureau of Labor Statistics publishes CPIs for two population groups: (1) the CPI for Urban Wage Earners and Clerical Workers (CPI-W), which covers households of wage earners and clerical workers that comprise approximately 32 percent of the total population and (2) the CPI for All Urban Consumers (CPI-U) and the Chained CPI for All Urban Consumers (C-CPI-U), which cover approximately 87 percent of the total population and include in addition to wage earners and clerical worker households, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPIs are based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and other goods and services that people buy for day-to-day living. Prices are collected in 87 urban areas across the country from about 50,000 housing units and approximately 23,000 retail establishments-department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of fuels and a few other items are obtained every month in all 87 locations. Prices of most other commodities and services are collected every month in the three largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits or telephone calls of the Bureau's trained representatives.

In calculating the index, price changes for the various items in each location are averaged together with weights, which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. For the CPI-U and CPI-W separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 27 local areas. Area indexes do not measure differences in the level of prices among cities; they only measure the average change in prices for each area since the base period. For the C-CPI-U data are issued only at the national level. It is important to note that the CPI-U and CPI-W are considered final when released, but the C-CPI-U is issued in preliminary form and subject to two annual revisions.

The index measures price change from a designed reference date. For the CPI-U and the CPI-W the reference base is 1982-84 equals 100.0. The reference base for the C-CPI-U is December 1999 equals 100. An increase of 16.5 percent from the reference base, for example, is shown as 116.5. This change can also be expressed in dollars as follows: the price of a base period market basket of goods and services in the CPI has risen from \$10 in 1982-84 to \$11.65.

For further details visit the CPI home page on the Internet at <http://www.bls.gov/cpi/> or contact our CPI Information and Analysis Section on (202) 691-7000.

Note on Sampling Error in the Consumer Price Index

The CPI is a statistical estimate that is subject to sampling error because it is based upon a sample of retail prices and not the complete universe of all prices. BLS calculates and publishes estimates of the 1-month, 2-month, 6-month and 12-month percent change standard errors annually, for the CPI-U. These standard error estimates can be used to construct confidence intervals for hypothesis testing. For example, the estimated standard error of the 1 month percent change is 0.06 percent for the U.S. All Items Consumer Price Index. This means that if we repeatedly sample from the universe of all retail prices using the same methodology, and estimate a percentage change for each sample, then 95% of these estimates would be within 0.12 percent of the 1 month percentage change based on all retail prices. For a 1-month change of 0.2 percent in the All Items CPI for All Urban Consumers, we are 95 percent confident that the actual percent change based on all retail prices would fall between 0.08 and 0.32 percent. For the latest data, including information on how to use the estimates of standard error, see “Variance Estimates for Changes in the Consumer Price Index, January 2005-December 2005” in the CPI Detailed Report, February 2006. These data are available on the CPI home page (<http://www.bls.gov/cpi>), using the following link <http://www.bls.gov/cpi/cpivar2006.pdf>

Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example below illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

Index Point Change

CPI	202.416
Less previous index	201.800
Equals index point change	.616

Percent Change

Index point difference	.616
Divided by the previous index	201.800
Equals	0.003
Results multiplied by one hundred	0.003x100
Equals percent change	0.3

Regions Defined

The states in the four regions shown in Tables 3 and 6 are listed below.

The Northeast--Connecticut, Maine, Massachusetts, New Hampshire, New York, New Jersey, Pennsylvania, Rhode Island, and Vermont.

The Midwest--Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

The South--Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia, and the District of Columbia.

The West--Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

A Note on Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year--such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index before adjustment for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-12-ARIMA Seasonal Adjustment Method. Seasonally adjusted indexes and seasonal factors are computed annually. Each year, the last 5 years of seasonally adjusted data are revised. Data from January 2003 through December 2007 were replaced in January 2008. Exceptions to the usual revision schedule were: the updated seasonal data at the end of 1977 replaced data from 1967 through 1977; and, in January 2002, dependently seasonally adjusted series were revised for January 1987-December 2001 as a result of a change in the aggregation weights for dependently adjusted series. For further information, please see "Aggregation of Dependently Adjusted Seasonally Adjusted Series," in the October 2001 issue of the [CPI Detailed Report](#).

The seasonal movement of All items and 54 other aggregations is derived by combining the seasonal movement of 73 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 73 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used in the aggregation of the dependent series for the last 5 years, but the seasonally adjusted indexes will be used before that period. Note: 48 of the 73 components are seasonally adjusted for 2008.

Seasonally adjusted data, including the All items index levels, are subject to revision for up to five years after their original release. For this reason, BLS advises against the use of these data in escalation agreements.

Effective with the calculation of the seasonal factors for 1990, the Bureau of Labor Statistics has used an enhanced seasonal adjustment procedure called Intervention Analysis Seasonal Adjustment for some CPI series. Intervention Analysis Seasonal Adjustment allows for better estimates of seasonally adjusted data. Extreme values and/or sharp movements which might distort the seasonal pattern are estimated and removed from the data prior to calculation of seasonal factors. Beginning with the calculation of seasonal factors for 1996, X-12-ARIMA software was used for Intervention Analysis Seasonal Adjustment.

For the seasonal factors introduced in January 2008, BLS adjusted 20 series using Intervention Analysis Seasonal Adjustment, including selected food and beverage items, motor fuels, electricity and vehicles. For example, this procedure was used for the Motor fuel series to offset the effects of events such as damage to oil refineries from Hurricane Katrina.

For a complete list of Intervention Analysis Seasonal Adjustment series and explanations, please refer to the article "Intervention Analysis Seasonal Adjustment," located on our website at <http://www.bls.gov/cpi/cpisapage.htm>.

For additional information on seasonal adjustment in the CPI, please write to the Bureau of Labor Statistics, Division of Consumer Prices and Price Indexes, Washington, DC 20212 or contact Jeff Wilson at (202) 691-6968, or by e-mail at Wilson.Jeff@bls.gov. If you have general questions about the CPI, please call our information staff at (202) 691-7000.

Table 1. Consumer Price Index for All Urban Consumers (CPI-U): U.S. city average, by expenditure category and commodity and service group

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See technical notes.

³ Indexes on a December 1996=100 base.

⁴ Indexes on a December 1986=100 base.

⁵ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Phoenix-Mesa, AZ; Pittsburgh, PA; Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA;

Tampa-St. Petersburg-Clearwater, FL.

⁶ Indexes on a November 1996=100 base.

- Data not available.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See technical notes.

³ Indexes on a December 1996=100 base.

⁴ Indexes on a December 1986=100 base.

⁵ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Phoenix-Mesa, AZ; Pittsburgh, PA; Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA;

Tampa-St. Petersburg-Clearwater, FL.

⁶ Indexes on a November 1996=100 base.

- Data not available.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

NOTE: Index applies to a month as a whole, not to any specific date.

Table 7. Chained Consumer Price Index for All Urban Consumers (C-CPI-U): U.S. city average, by expenditure category and commodity and service group

(December 1999=100, unless otherwise noted)

C-CPI-U	Relative importance, 2005-2006	Unadjusted indexes		Unadjusted percent change to May 2008 from—	
		Apr. 2008	May 2008	May 2007	Apr. 2008
Expenditure category
