## Consumer Price Index, Northeast Region – October 2019

### Regional prices down 0.1 percent over the month; up 1.5 percent over the year

The Consumer Price Index for All Urban Consumers (CPI-U) in the Northeast inched down 0.1 percent in October, the U.S. Bureau of Labor Statistics reported today. Sheila Watkins, the Bureau’s regional commissioner, noted that over-the-month decreases in the all items less food and energy index (-0.1 percent) and the energy index (-0.8 percent) were nearly offset by an increase in the food index, up 0.3 percent. (Data in this report are not seasonally adjusted. Accordingly, month-to-month changes may reflect the impact of seasonal influences.)

Over the last 12 months, the Northeast all items CPI-U increased 1.5 percent. (See [chart 1](#) and [table A](#).) This was due almost entirely to an advance in the all items less food and energy index, up 2.2 percent. The food index also rose, up 2.0 percent since October 2018, while the energy index declined 6.5 percent. (See [table 1](#).)

**Chart 1. Over-the-year percent change in CPI-U, Northeast region, October 2016–October 2019**

Source: U.S. Bureau of Labor Statistics.

## Food

The food index edged up 0.3 percent since September. Prices were higher for food at home (0.5 percent) and for food away from home (0.1 percent).

From October 2018 to October 2019, the food index increased 2.0 percent. Prices for food away from home increased over the year, up 3.1 percent; those for food at home rose 1.1 percent.

## Energy

The energy index, which includes prices for household and transportation fuels, declined 0.8 percent in October, reflecting lower electricity prices, down 2.8 percent. Prices were also lower for gasoline (-0.7 percent) while those for utility (piped) gas service were higher (1.8 percent).

The energy index decreased 6.5 percent since October 2018. The decline reflected lower prices for gasoline (-9.9 percent) and electricity (-4.1 percent), while those for utility (piped) gas service increased (1.4 percent) over the year.

## All items less food and energy

The index for all items less food and energy inched down 0.1 percent over the month. Lower prices for shelter (-0.3 percent) and apparel (-0.9 percent) were nearly offset by increases for medical care (0.7 percent) and recreation (0.4 percent), among others.

The index for all items less food and energy increased 2.2 percent since October 2018, led by higher prices for shelter and medical care, up 2.3 and 5.4 percent, respectively. Prices also rose over the year for education and communication (2.6 percent) and other goods and services (3.2 percent), among others.

**Table A. Northeast region CPI-U 1-month and 12-month percent changes, all items index, not seasonally adjusted**

## Geographic divisions

Additional price indexes are now available for the two divisions of the Northeast. Over the month, the all items CPI-U decreased 0.3 percent in the New England division, while remaining unchanged in the Middle Atlantic division.

Over the year, the all items index advanced 1.6 percent in the New England division. (See [table B.](#)) Prices also rose in the Middle Atlantic division, up 1.4 percent.

**Table B. CPI-U 1-month and 12-month percent changes, all items index, Northeast region and divisions, not seasonally adjusted**

Area	1-month change	12-month change
Northeast.....	-0.1	1.5
New England Division .....	-0.3	1.6
Middle Atlantic Division.....	0.0	1.4

**The Consumer Price Index for November 2019 is scheduled to be released Wednesday, December 11, 2019, at 8:30 a.m. (ET).**

### Technical Note

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPIs for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 93 percent of the total population and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which covers approximately 29 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Each month, prices are collected in 75 urban areas across the country from about 5,000 housing units and approximately 22,000 retail establishments--department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index.

The index measures price changes from a designated reference date (1982-84) that equals 100.0. An increase of 16.5 percent, for example, is shown as 116.5. This change can also be expressed in dollars as follows: the price of a base period "market basket" of goods and services in the CPI has risen from \$10 in 1982-84 to \$11.65. For further details see the CPI home page on the Internet at [www.bls.gov/cpi](http://www.bls.gov/cpi) and the BLS Handbook of Methods, Chapter 17, The Consumer Price Index, available on the Internet at [www.bls.gov/opub/hom/pdf/homch17.pdf](http://www.bls.gov/opub/hom/pdf/homch17.pdf).

In calculating the index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Because the sample size of a local area is smaller, the local area index is subject to substantially more sampling and other measurement error than the national index. In addition, local indexes are not adjusted for seasonal influences. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. **Note: Area indexes do not measure differences in the level of prices between cities; they only measure the average change in prices for each area since the base period.**

The **Northeast region** is comprised of Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont.

The **New England division** is comprised of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.

The **Middle Atlantic division** is comprised of New Jersey, New York, and Pennsylvania.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.
